UNIVERSITY OF EDUCATION
"UExam" Semester-II, 2019
MA Special Education, Session:2018-20

Course Code: SPED3116
Subject: Research Methods in Special Education

Max. Marks: 42

Time Allowed: 100 Minutes.

Section II (Short Answer)

3x6 = 18

Q.2- Write short answers of the following.

i.   Differentiate interval and ratio level of measurement with example?
ii. Define educational research?
iii. What is historical research?
iv. Briefly explain what is the significance of research proposal?
v.   Write three advantages and disadvantages of interview as a research instrument
vi. Differentiate between positive and negative correlation with example

Section III (Essay Type)

6x4 = 24

Answer the following Questions

Q.3 Define population and sample and write in detail the types of nonprobability sampling with examples?

Q.4 Explain what is descriptive research?

Q.5 Define what is reliability. What are some common types to measure reliability?

Q.6 Write short note on following
    i. Threats to internal validity
    ii. Observation as a method of data collection

SECTION: I (MCQ's)

Time Allowed: 20 Minutes   Max. Marks: 18

NOTE: Encircle the correct/ best answer in each of the followings. Each Question carries 1 mark. Use of remover carries zero mark. Cutting and Overwriting is not allowed.

Q1.

- Convenient sampling is an example of
a) Probability sampling   b) random sampling   c) non-probability sampling d) cluster sampling

- The statement of purpose in a research study
a) Design   b) objectives   c) people to be used in study   d) describe the study

- One step that is not included in planning a research to
a) Identify a problem   b) develop a research plan   c) research question d) analysis of the research

- Sources of researchable problems can include
a) Theory & past research   b) solvable issues   c) researchers' own experience   d) all of them

- A review of the literature prior to formulating research questions allows the researcher to
a) familiar with prior research   b) identify methodological problems   c) both   d) none

- The feasibility of a research study should be considered in the light of
a) Cost and time   b) Researcher's skills   c) Both   d) None

- A research plan should be
a) in detail   b) others should review & comment   c)Sets out rationale for study d) All the above

- The Method section of the research plan typically specifies
a) Research sample   b) Methodology   c) Procedure   d) All of the above

- Quantitative research
a) Explain predict phenomena   b) Generalize results   c) Both   d) None of the above

- In case study researcher uses
a) Random sampling   b) Cluster sampling   c) Purposive sampling   d) Quota sampling

- The most meaningful problems are generally derived from
a) Theory   b) researcher's personal experience   c) both a & b   d) none of these

- In which research selects groups randomly
a) Stratified sampling   b) random sampling   c) cluster sampling   d) systematic sampling

- There is NO chance of sampling bias in
a) Quota sampling   b) random sampling   c) purposive sampling   d) non probability sampling

- It is a measurement without instrument
a) Test   b) observation   c) interview   d) questionnaire

- Quota sampling is the type of sampling
a) Non probability   b) probability sampling   c) stratified sampling   d) none of above

- The degree to which a test measures an intended hypothetical construct is called
a) Content validity   b) concurrent validity   c) predictive validity   d) construct validity

- The first step in problem formulation is
a) choosing a broader area   b) writing the statement   c) narrowing down   d) double check

- A good research problem must be
a) Interesting   b) researchable   c) both   d) none

Question carries 1 mark. Use of remover carries zero mark. Cutting and
Overwriting is not allowed.

Q1.

- The depth exploration or case study approach to the client and vocationally related circumstances
  is............level
  a) Screening   b) Clinical   c) Comprehensive   d) Vocational

- Conscious knowledge of one's own character, feelings, motives and desires is
  a) Self awareness   b) Self esteem   c) Self actualization   d) None

- Test which assess numerical reasoning and problem solving abilities is
  a) Verbal   b) Quantitative   c) Abstract   d) Arithematic

- Assessment which usually produce a written document, such as a paper, test or quiz is
  a) Traditional   b) Vocational   c) Ecological   d) Situational

- Systematic observation and recording of work behavior and performance that occurs over time is
  known as............Evaluation
  a) Traditional   b) Vocational   c) Ecological   d) Situational

- The act of looking for employment, due to unemployment is
  a) Job hunting   b) Job seeking   c) Job searching   d) All of these

- .Determining the tools and equipment needed to do a job is
  a) Installation   b) Equipment selection   c) Active listening   d) Repairing

- Which of the following is the way to explore our individual personality is
  a) Self awareness   b) Self concept   c) self image   d) None of the above

- Adjusting actions in relation to other's actions
  a) Mentoring   b) Monitoring   c) Coordination   d) Cooperation

- A test of developed skill or knowledge is
  a) Aptitude   b) Achievement   c) Inventory   d) None

- Test which help you to figure out natural talents is
  a) Aptitude   b) Achievement   c) Inventory   d) All of these

- A formal meeting in which one or more prsons question, consult, or evaluate another person is
  a) Interview   b) Observation   c) Questionnaire   d) All of these

- Systematic attempt to influence career development through educational strategies is career
  a) Counseling   b) Education   c) Development   d) All of these

- Realistic type of personality is also known as
  a) "Thinkers"   b) "Doers"   c) "Social"   d) "Creators"

- Learning by doing and experiencing the consequences of your action is
  a) Vicarious   b) Enactive   c) Observation   d) All of these

- Persons who likes to work with numbers, records or machines are known as
  a) Conventional   b) Artistic   c) Realistic   d) Social

- A test chich measures an individual's ability to perform a certain kind of job is
  a) Ability test   b) Achievement test   c) Interest measures   d) none of these

- Real or simulated work is used as the focal point of the evaluation in...............evaluation
  a) Vocational   b) Situational   c) Traditional   d) Ecological
